

Tribal Opioid Response Evaluation

I will take questions after the presentation

A little about me

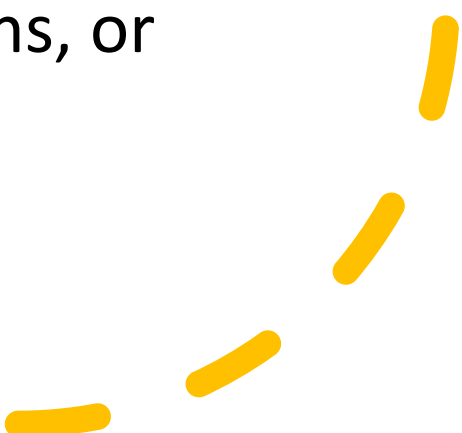

Mary Costello MS

Graduated with a master's degree in public policy in December of last year (2022)

Completed evaluation projects for the NM Veteran's Home in T or C, Saranam (nonprofit homeless org), NM Farmer's Market Association, and Domestic Violence Offender Treatment Intervention (DVOTI).

I will be the staff member in charge of all data related activities with this grant including submitting data to SAMHSA, collection of data, interpretation of that data, and presenting data to partners.

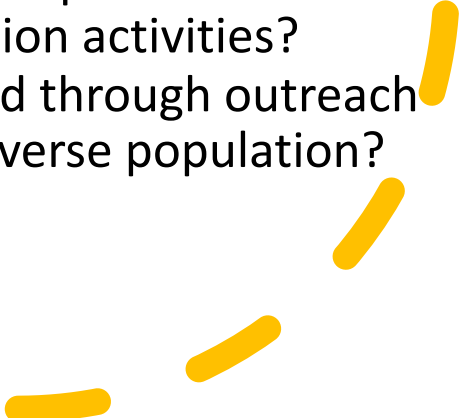

All data
collected
belongs to
YOU!

- Please ask me any questions regarding how the data will be used, who it's going to, or how I interpret data, etc.
 - The only questions that I will NOT answer are those that would disclose a person or tribal community's anonymity.
 - Please feel free to also give me any feedback on any surveys, data presentations, or evaluation output that I put out.
- 

What data do we need to submit to SAMHSA?

- See list in packet
- 1. How many Naloxone kits have we purchased? (we provide this data)
- 2. How many Naloxone kits have we distributed?
- 3. Of the Naloxone kits distributed, how many overdose reversals occurred? (need help figuring out how to get this info)
- 4. How many Fentanyl test strips were purchased? (we provide this data)
- 5. How many Fentanyl test strips were distributed?
- 6. How many first responders have we trained on recognizing an opioid overdose and the use of Naloxone?

What data do we need to submit to SAMHSA?

- See list in packet
 - 1. How many key community sectors (family, peers, military, coalitions, etc.) has your entity trained on opioid overdose and Naloxone?
 - 2. How many people were educated on the consequences of opioid and/or stimulant misuse using strategic messaging?
 - 3. How many school-aged children received prevention and education activities on opioid consequences or stimulant misuse?
 - 4. How many people in your entity were trained to provide school-based prevention and education activities to school aged children?
 - 5. How many people were educated on the consequences of opioid and stimulant misuse through prevention activities?
 - 6. How many people in your entity were reached through outreach activities that target underserved and/or a diverse population?
- 

Data contd.

Within 3 months of grant award with the goal of identifying progress and/or barriers we will collect

- 1. Relevant documents** and materials including activity logs, meeting minutes, fiscal reports, evaluation presentations, and grant-related documents. The team will review these to gauge success in anticipated goals.
- 2. Fidelity data** will be collected continuously regarding **Evidence Based Practice training** implementation.
3. Evaluations of **trainings** will be conducted related to **satisfaction** with the curriculum, usefulness of training materials, and integration of learning into practice.

Survey Monkey Scan Instrument

- In order to better serve you, we created a survey to see what your community already does for opioid prevention.
 - It's the same survey as the 988 scan instrument. Yours will just be a little longer.
 - This survey is imperative to complete so that we are not being duplicative.
 - I will send the survey monkey link out immediately following this meeting to the director from each tribal community.
 - Complete the survey as a group.
 - Due date: March 8th, 2023
- 

TOR Data Due Dates

- Survey Monkey: March 8th, 2023
- SAMHSA data Q1: January 17th, 2023
(already submitted)
- SAMHSA data Q2 April 17th, 2023
- 6 months progress report: April 17th 2023
- SAMHSA data Q3: July 17th, 2023
- SAMHSA data Q4: October 17th, 2023
- Annual Report: December 15th, 2023

Q&A
